Personally, I feel that these items ought to be purchased because (1) the .223 ammunition is key to our use of the M-15's (items made specially for us by Remington; (2) the reloading supplies ensure that we will have ammunition after it can no longer be purchased.

As a final note, you may be interested in knowing that Remington is sold out of all of its ⁶⁴⁴supplies for the year. This shows that there are many groups and individuals stocking up on guns and ammunition. Dick told me that he could not fill our orders if we had to start over again at this point.

Respectfully,
