The FV 603 Saracen was developed in the early 1950s and for more than 15 years was the standard Armoured Personnel Carrier for the British Army. In this role the Saracen is still in active service. It is part of the 600 series of vehicles and as such shares many of their components such as Rolls Royce engine, all wheel drive and fully independent torsion bar suspension.

A.F. Budge (Sales) are able to offer ex-stock pre-used Saracen Armoured Personnel Carriers and Ambulances at very competitive prices.

All Saracens we offer for sale are low mileage since major overhaul vehicles, fully serviced, and can be painted in the customer's choice of colour.
